ON SITE INCINERATION

The **MB240** is a top loading incinerator specifically designed to suit the needs of the poultry farmer, veterinary clinics and butchers. Although the most common incinerator in our range other sectors of the industry have found the benefits of owning a **MB240**, with current applications including dairy, pig, sheep and fish farms. Together with the added advantage of virtually no smoke or smell problems the compact design of this model ensures space saving technology as well as offering a cost effective method of waste disposal.

FEATURES

- DEFRA & DARD Type Approved
- 5mm Steel Construction
- 25mm High Density Insulation
- 75mm High Quality Refractory Lining
- Designed for Outdoor Use
- IP68 Rated
- Factory Wired
- Factory Installed Pipework
- Factory Test Fired
- 10 M Pipe For On Site Install
- 2 Stage Burners
- Individual Chamber Temperature Control
- Pre Incineration Warm Up Cycle
- Post Incineration Cool Down Cycle
- Variable Time Control
- 24hr Burner Exchange Service

Model No:
MB240

Model No.	MB 240
Fuel Type	Oil
Cubic Capacity (Mtr)	0.35
Door Aperture (mm)	550 x 750
EXTERNAL DIMENSIONS	
Length (mm)	1660
Width (mm)	1250
Height incl. Flue (mm)	3300
INTERNAL DIMENSIONS	
Length (mm)	1000
Width (mm)	550
Height (mm)	640
FUEL CONSUMPTION (GUIDE ONLY)	
Gallons / hour	1.4
MINIMUM OPERATING TEMPERATURE	
Degrees Centigrade	950
RESIDENCY TIME IN AFTERBURNER CHAMBER	
Seconds	2
Temperature Monitoring	YES
